

# Comin' To Your City

## Big & Rich

Well we're comin' to your city  
Gonna play our guitars and sing you a country song  
We'll all be flyin' higher than a jet airliner  
And if you want a little bang in your ying yang come along  
Well we flew through Cincinnati and we all got really happy  
Grabbed a bowl of that skyline chili along the way  
Then we rolled on into Canton scared the hell out of Marilyn Manson  
And the party started happenin', hey hey hey  
Then in the middle of a Charleston night, we ran into Jessica White  
And a little moonshine got us right plumb smack insane  
And we're comin' to your city  
Gonna play our guitars and sing you a country song  
We'll all be flyin' higher than a jet airliner  
And if you want a little bang in your ying yang come along  
Well we broke down in Greenville in the middle of a hayfield  
But a Bud Light truck pulled up and helped us out  
So we dead headed up to Philly, partied down like real hillbillies  
Brought the Music Mafia and rocked it out  
And Chippewa's where we go when we're up in Buffalo  
Don't you know those Yankees drink enough to drown?  
Yeah we're comin' to your city  
Gonna play our guitars and sing you a country song  
We'll all be flyin' higher than a jet airliner  
And if you want a little bang in your ying yang come along, come along  
Listen up  
Now LA's got the freaks at Pinks and 15 dollar drinks  
And San Antonio is a wild wild rodeo  
And in Phoenix, Arizona we drank way too much Corona  
And we woke up by the river in Jeff City, MO  
And we're comin' to your city  
Gonna play our guitars and sing you a country song  
We'll all be flyin' higher than a jet airliner  
And if you want a little bang in your ying yang come along  
Yeah, yeah  
We're comin' to your city  
We're gonna play our guitars and sing you a country song  
We'll all be flyin' higher than a jet airliner  
And if you want a little bang in your ying yang  
If you want a little zing in your zang zang

If you want a little ting in your tang tang  
Come along, come along, come along, come along  
Yeah, we're comin' to your city
