

New York City

Mason Jennings

New York City, you're so pretty
All your faces, going places
And I believe if you fall in love
I believe if you fall in love You should jump right in
You should jump right in
You should jump right in
You should jump right in Always going, faster modern
Cell phone fables, candle-lit tables
I believe if you fall in love
I believe if you fall in love You should jump right in
You should jump right in
You should jump right in
You should jump right in And I wrote our initials in the sidewalk cement
Tattooed your name across my arm for all to see
I wanna sing about it, sing about it, sing about it
I've got your back from now on baby, you can count on me Only one life, kisses all night
Kids round fountains, concrete mountains
I believe if you fall in love
Yes, I believe if you fall in love You should jump right in
You should jump right in
You should jump right in
You should jump right in And I wrote our initials in the sidewalk cement
Tattooed your name across my arm for all to see
I wanna sing about it, sing about it, sing about it
I've got your back from now on baby, you can count on me I believe if you fall in love
I believe if you fall in love You should jump right in
