

# Indifference

Yvette Horner

Your pretending fooled us all  
Optimistic delusional  
Hyperactive and so it shows  
Its time to measure the immeasurable  
Our indifference grows  
From the common evil known

The future's laid out beautiful  
Designs suggesting hints to God  
I'd like to fathom the unfathomable  
And swear to find that certain pressure point  
Our indifference grows  
From the common evil known  
Held down by words
