

Strangest Love

Britney Spears

stuck here
so far from home
talking
but they don't know
can't make sense of the signs
i thought i would die
till you looked in my eyes
till something changes
it's a different language
it's words say too much and get in the way of me talking the strangest love
i never had
any where to go
nothing
i've been here all alone
no one to show me
no one can hear me
baby just tell me

till something changes
it's a different language
it's words say too much and get in the way of me talking the strangest love
till something changes
it's a different language
it's words say too much and get in the way of me talking the strangest love
i don't have to know what you're saying
i don't have to be afraid no more
don't talk no more
they aren't the words i want
till something changes
till something changes
it's a different language
it's words say too much and get in the way of me talking the strangest love
strangest love
strangest love
strangest love
strangest love
