

# Train in Scotland

## Cutthroat Shamrock

and it was a cold night on Road Street  
and in the den of thieves where you could watch the wolves eat  
and the graveyard shift gets mighty cold  
matches worth their weight in gold

oh god forbid they take you on that train  
oh god forbid they take you on that train

there was a train in Scotland let the body snatchers ride  
down in that dark, damp valley where you get money for your hide  
now you might not believe its true  
read the books and they'll tell you

there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride

the cleaners of the plague would come by  
and take all those who died in the night  
but those who died just weren't enough  
so the snatchers took the livin' ones  
and then they go a ridin' on that train  
and then they go a ridin' on that train

there was a train in Scotland let the body snatchers ride  
down in the damp, dark valley where you get money for your hide  
now you might not believe it's true  
read the books and they'll tell you

there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride

oh there was a train in Scotland let the body snatchers ride  
down in a dark damp valley where you get money for your hide  
now you might not believe it's true  
go read the books and they'll tell you

there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride  
oh there was a train in Scotland let em ride
