

# Side Effects of You

## Fantasia

I  
Was looking for a cure to pull me through  
Tryin to decide which medicine to use  
And every bottle has your name on the label  
Doctor said you keep me stable  
So now,  
I'm taking three a day to help me smile  
They said I should wait and try it for a while  
So I've been ignoring my symptoms  
And the small print on the back of my prescription What I'm gonna do is fever over 98,  
You hold me and my body shakes  
See nobody told me, nobody told me  
The side effects of you, losing balance, falling down  
Sleepless nights whenever you're around  
Nobody told me, nobody told me  
The side effects of you  
The side effects of you I  
Double checked the recommended dose  
'Cause recently my headaches getting worse  
Sometimes every part of me is shaking  
Is this the right pill that I'm taking What I'm gonna do is fever over 98,  
You hold me and my body shakes  
Nobody told me, nobody told me yeah  
The side effects of you losing balance, falling down  
Sleepless nights whenever you're around  
Nobody told me, nobody told me  
The side effects of you You're supposed to take away the pain  
But it hurts the same  
And it's getting harder  
I thought you were taking care of me  
But I can't breathe  
And it's getting harder Fever over 98,  
You hold me and my body shakes  
Nobody told me, nobody told me  
The side effects of you, losing balance, falling down  
Sleepless nights whenever you're around  
Nobody told me, nobody told me  
The side effects of you  
The side effects of you

Baby, the side effects of, you
