

You Wanted It (Album Version)

MoZella

(Verse 1)

Sweet and low and to the point

You always get your way.

But I've long run out

Of anecdotes and words

To fill the space.

If this is suppose to be something more

Then kindly explain what all

The pain is for cause(Chorus)

You wanted it. You wanted it.

Don't lie to me.

Don't act like I wanted it more.

You wanted it. You wanted it.

Don't hide from me/cry to me (on second & last chorus).

It's time that we settle the score

Once and for all.(Verse 2)

I picture myself up in your face.

Then I picture myself walking away.

But it never seems to go that way.

That's so much easier than what

I've got to say.

And if this is supposed to be something more

Then kindly explain what all the pain is for cause(chorus)(Bridge)

All you wanted was to wear me out

Test my strength

And prove my doubts

But that's not what love's about.(Chorus)
