

# Break the Night

## Star Screem

Its time to dance to break the night  
Coz when we dance well break the night  
Shake your bones all through the night  
You shake meIn the dark your art imitates life  
A distant beat coming from inside  
Of your chest Miss Electrophile  
Shes on the floor and it drives me wildCall it the affairs of the heart  
Committing affairs on the heartIts time to dance to break the night  
Coz when we dance well break the night  
Shake your bones all through the night  
You shake meIn the dark my object of desire  
Shes set to stun with her killer eyes  
Were supervisual genocide  
With shock and awe we will break the nightCall it the affairs of the heart  
Committing affairs on the heartIts time to dance to break the night  
Coz when we dance well break the night  
Shake your bones all through the night  
You shake me
