The Time The Place

Motor Ace

Find the time the place
Regret these lies
Your ties, okay arrest me
Sign your name to drive your fame
You lose your touch
You think far too much
I'm aware you can't protect me
When it's time you want to fail me
But I'll be here when you're too wasted to know
Wide and awake
And you bleed for me now
Don't try to take
Don't dream
We'll start to run
As we watch you come undone
Wide and awake
And you bleed for me now
Don't try to imitate
Don't dream
We start to run
As we watch you come undone
Find the time the place
Forget me
I'm alive, okay arrest me
Sign your name the lights the game
You chose but I'm still young
I've got my back against the wall
Don't need no friends at all
You're trying to think at me
I've been down here before
You lose time
Now you're my front line
Wide and awake
And you bleed for me now
Don't try to imitate
Don't dream
We'll start to run
As we watch you come undone
Wide and awake

And you bleed for me now
Don't try to imitate
Don't dream
We'll start to run
As we watch you come undone
They watch you crawling now
Time isn't all used up
You say what you need to shout
Your time and your place here
Your time and your place so clear
