

First Time

August Alsina

I know you heard that I'm a choosy lover
Realest nigga I know, bet you won't find another
If you're tryna to be my object of affection, my number one selection
Girl listen close, I'm 'bout to learn you something
I ain't never been one to catch feelings, I come and I go as I please
Not sayin' I'm pimpin' forever, for now this is how it's gon' be
Just tryna stay in the moment and chasing this paper, I'm focused
But if you ain't with it, then clear it, the look in your eyes say you open
Girl I was just rollin' through the hood
when I saw you sexy
Damn you looking good, when you caught my eye
Told you I just need somebody for me
Then you started walking over slowly, this is what you told me
I'm so glad you chose me
But this would be my very first time, very first time
This would be my very first time
And I don't want to waste your time
I'm so glad you chose me
But this would be my very first time, very first time
This would be my very first time
So promise me you'll take your time
Said, it's her first time with a real nigga
Never had a man who could boss up, know how to deal with her
Not in a rush, know how to chill with her, when I'm down to fuck, keep it real with her
Ain't nothing new, been trill with her, keep the Tommy on me like Hilfiger
So girl if you with it, stop playing and get it, save all that talking, you ready to live it
If you want me to take it, I want you to give it and if you can take it, the sky is the limit
I wanna take you as high as the ceiling, you know you're first, have you all in your feelings
Who ever knew we could have it this good? Damn
Girl I was just rollin' through the hood when I saw you sexy
Damn you looking good, when you caught my eye
Told you I just need somebody for me
Then you started walking over slowly, this is what you told me
I'm so glad you chose me
But this would be my very first time, very first time
This would be my very first time
And I don't want to waste your time
I'm so glad you chose me
But this would be my very first time, very first time
This would be my very first time
So promise me you'll take your time
