

# Fight

## Grand Magus

They forged an alliance - and legions attend  
They steal and conspire - all means to an end  
Soon they must fall - we'll rise from our crawl  
And summon the strength from within'Cause we will fight for the right to defend  
    Fight for the right till the end  
    Conquer and divide  
Fight for the right to surviveThrough ages of darkness, slavery and pain  
    The lie they call "progress" - an expanding domain  
    Soon they must fall - we'll rise from our crawl  
        And summon the strength from within  
        And we will fight for the right to defend  
        Fight for the right 'til the end  
        Conquer and divide  
Fight for the right to surviveFight with the power of rage  
    Fight to the end of our age  
    With fury burning inside  
Fight for the right to surviveFor too long did we relent  
    While they stole at our expense  
    Now the tide has turned  
        They must fall  
and we will rise standing tallFight with the power of rage  
    Fight to the end of our age  
    With fury burning inside  
    Fight for the right to survive  
    Fight for the right to defend  
    Fight for the right 'til the end  
        Conquer and divide  
        Fight for the right to survive
