

If You Have Love

Crystal Bernard

Friends, I've had a few
Lovers too, they come and go
I've wasted time chasin' dreams
Acquiring things, too young to know That if you have heart
You'll find gold
If you have strength
You'll have control If you have faith
You'll stand tall
But if you have love
You have it all I've had a taste of sweet success
It's good at best if you're all alone
I came so close to a dream come true
When I held you, I should have known That if you have heart
You'll find gold
If you have strength
You'll have control If you have faith
You'll stand tall
But if you have love
You have it all If you have heart
You'll find gold
If you have strength
You'll have control If you have faith
You'll stand tall
But if you have love
You have it all Oh, if you have love
You have it all
