

# In Common - Black Coffee Remix

## Alicia Keys

Said I'd be gone by five  
But it's sun rise and I'm still in your bed  
Goodnight usually means goodbye  
Me re-playing memories in my head  
Look at you, look at you  
Look what you made me do  
How do you, how do you think know my every move  
Who are you Who are you You look so familiar  
I know you, I know you, baby, I know the truth We got way too much in common  
If I'm being honest with you  
We got way too much in common  
Since I'm being honest with you Who wants to love somebody like me?  
You wanna love somebody like me?  
If you could love somebody like me  
You must be messed up too  
Who wants to love somebody like me?  
You wanna love somebody like me?  
If you could love somebody like me  
You must be messed up too We used to talk 'til midnight  
All those days that you stayed at my house  
We were just passing the time  
When we were young and we ain't had no vows  
Now, now, now maybe later on, I'll text you and maybe you'll reply  
We both know we had no patience together day and night  
Getting high on our supply, yeah, we ain't satisfied  
I could love you all occasions We got way too much in common  
If I'm being honest with you  
We got way too much in common  
Since I'm being honest with you Who wants to love somebody like me?  
You wanna love somebody like me?  
If you could love somebody like me  
You must be messed up too  
Who wants to love somebody like me?  
You wanna love somebody like me?  
If you could love somebody like me  
You must be messed up too Messed up too, messed up too  
Just like you, just like you  
Messed up too, messed up too  
Just like you, just like you We got way too much in common

If I'm being honest with you  
We got way too much in common  
Since I'm being honest with you Who wants to love somebody like me?  
You wanna love somebody like me?  
If you could love somebody like me  
You must be messed up too  
Who wants to love somebody like me?  
You wanna love somebody like me?  
If you could love somebody like me  
You must be messed up too
