

Bones

Alex G

You struck me like a bolt of lightning
Running through me in the dead of night and I know it
I know it.

Now I see you when I close my eyes you're
the only reason why I live and die, and I know it
I know it. And I feel you down in my soul

You rattle my bones

It's running me over and over

And I feel you burning my heart

It rattles my bones

You're running me over and over..Light me up in a burning fire
See the smoke written in the sky that I know it

I know it.

And I'm never gonna try to fight it

You're the reason why I live and die and I know it,

I know it. And I feel you down in my soul

You rattle my bones

It's running me over and over

And I feel you burning my heart

It rattles my bones

You're running me over and over..Oh you're running me over, you're running me over, you're running me over
woahhh. You're runnin' me over, you're runnin' me over you're runnin' me over..

You're runnin' me runnin' me, runnin' me runnin' me, running me over and over

You're running me over! You're running me over! You're running me over and over!

And I feel you down in my soul.

You rattle my bones.

It's running me over and over....And I feel you down in my soul

You rattle my bones

It's running me over and over

And I feel you burning my heart

It rattles my bones

You're running me over and over..You rattle my bones

Woah
