

# U Got A Woman

[Tiffany Evans](#)

I am a woman baby  
Yes I'm far from a girl  
Whatever you need boy I'll be here to please  
I'll hope you down no doubt  
See I know what you want let me be your supplier  
However you have it let me be your .... get you right  
I give you that good love straight up and down ...  
Even though I am young I still gotta few things to teach you  
I aint playing when I said I been here before  
I aint playing when I said that I'm the one  
You got a woman baby  
You got a woman baby  
You got a woman baby  
You got a woman baby  
Get you one more time when I come around  
I will love .. take over over over  
Get you one more time when I come around  
I will love .. take over over over  
I came the last one  
You want a piece of me  
I give you all of me  
Come with me .. forever .. so much more  
Anything that you want from me  
Aint no other woman like me  
Decide what you want let me be your supplier  
I give you that good love  
Even though I am  
I imply what I said I have been here before  
I imply when I said I am the one  
You got a woman baby  
You got a woman baby  
You got a woman baby  
You got a woman baby  
Get you one more time when I come around  
I will love .. take over over over  
Get you one more time when I come around  
I will love .. take over over over  
Take over
