

Get It Over With

Rihanna

It's dark in the day, now say, now don't complain
Look up the sun it's just a call away
You so afraid to cry, but your heart be feeling dry
It's time to change
But you keep thundering thundering
I'm wondering wondering why it keep thundering
Won't you just pray, and get it over with Tonight feel the pain, now baby I won't complain
I hate saying look up the sun it's just a call away
And I was so afraid to cry
And when you need a way to ride, that's the way
Keep thundering thundering
I'm wondering wondering why it keep thundering
Want to just fucking rage and get it over with
And get it over with
I see you rolling it
Let's get it over with
Get high and float again
Roll up and go again
I see you rolling it
Let's get it over with
Get high and float again
Roll up and go again It's alright we can roll in the clouds
Getting high we can float in the clouds
It's alright we can roll in the clouds
Getting high we can float in the clouds
It's alright we can roll in the clouds
Getting high we can float in the clouds Keep thundering thundering
I'm wondering wondering why it keep thundering
Want to just fucking rage and get it over with
And get it over with
And get it over with It's alright we can roll in the clouds
Getting high we can float in the clouds We should be lightning up
We should be lightning up
We should be lightning up
Start it with a lightning It's dark in the day, now say, now don't complain
Look up the sun it's just a call away
