All God's Children

Finn Brothers

We're all God's children
And God is a woman
But we still don't know
Who the father isI can't help thinking
There's a fortune riding
On the answer
To that questionWe stop for a moment
And forget the enemy
There's something
You're not telling usGot to make you less lonely
Time to make you less lonelyWe're globalizing
But we don't like competition
And we still don't know
Who the father isBut you're so damn pretty
And don't you know it
There's a kiss and then
We all make upGot to make you less lonely
Got to make you less lonelyAll sides
Die happy
This is the last chance
You've got to do it nowPeople are waiting
For him to come around
All his attention
We've got to stick aroundYou might be less lonely
Got to make you less lonelySome people now
Help me
Don't make me less lonely
Don't you drive me out
