

# Wish You Well

[Joshua Hyslop](#)

Oh, my love, I hold you near  
If only I was unafraid of all my fears  
I wish I did not have to go  
but I've already compromised more than you now

And when the taste of love has gone stale  
What you're dreaming of, you won't tell  
And if you'll soon be gone, then I'll wish you well  
I wish you well

Oh, my heart is still the same  
Yeah, a little older now, but it won't change  
There is love left in me still  
Though I may not feel it now, someday I will

It seemed so real to me then  
Now it's gone it has faded again  
For the love you scorn there will be an end  
Here it comes again

---
