

Love Lost Love (2007 Remaster)

UFO

Saturday night, we're all on the lookout for some thrills
Try to catch the band's last song
Backstage pass really showin' out
Feel that's where i belong Sittin' down with all the big stars at the bar
I really have a rock vocation
From monopedemania to schizophrenia
Rise to any situation* of old lost love, where will you go
When the show is over
Nobody wants to know**
We need to feel
Something that's real
'cause you're losin' from the start
So be careful with your heart--solo--

**

Repeat

Partners in the next bed and they're dancing cheek to cheek
Can't understand their highbrow conversation
Yes, you're pretty, who needs a pretty face
With a hot lips reputation*
Repeat
