

Mercury Summer

Fightstar

I hope we make it through
I hope the sea is just as blue as our dream
We've got a long way to climb
Until we see what we've left behind We wake to the sound of drums
And we are the soldiers of our own events
We are the keys to the kingdom
And we will never wear clothes again You get up, move around
Every time you hear a sound
What do you expect to see
Every time you look at me
I know this is gonna be alright Mercury summer, mercury summer
In the afternoon I hope you come back soon
Mercury summer, mercury summer
You just take your time, I hope to see you So how can you fall asleep
So close to the fire that is keeping us warm
Sleeping out in the rough
Just let me know when you've had enough You get up, move around
Every time you hear a sound
What do you expect to see
Every time you look at me
I know this is going to be alright Mercury summer, mercury summer
In the afternoon I hope you come back soon
Mercury summer, mercury summer
You just take your time, I hope to see you Mercury summer, mercury summer
In the afternoon I hope you come back soon
Mercury summer, mercury summer
You just take your time, I hope to see you Mercury summer
In the afternoon I hope you come back
Mercury summer, mercury summer
You just take your time, I hope to see you Mercury summer, mercury summer
In the afternoon I hope you come back soon
Mercury summer, mercury summer
You just take your time, I hope to see you
