

# Beyond the Pale

## Exodus

    Sinners heart can't think or feel  
    The sharp sting of slicing steel  
        Punish, kill, repeat  
    The death caress, so bittersweet  
        I live outside the rule of law  
    My one decree is shock and awe  
        Black sheep of my kind  
        Progeny of hate refined

    Suffering spreads like the plague  
    Reasons why, still oh so vague  
    The siren song of slaughter summons me  
        To inner demons I succumb  
    I know not that which I've become  
        Exhibit A in man's atrocity

    Take the gun, take the knife  
    Take the pain, then take the life  
        My taste for homicide  
        Is rising up and amplified  
    Bloody deeds, my only friend  
        With me til the bitter end  
        Together we are one  
    And our work has just begun

    Suffering spreads like the plague  
    Reasons why, still oh so vague  
    The siren song of slaughter summons me  
        To inner demons I succumb  
    I know not that which I've become  
        Exhibit A in man's atrocity

    [Chorus]  
    Plea for mercy  
        To no avail  
    Killers of my kind live  
        Beyond the pale  
        In this world of mine  
    They say I don't belong  
        Something that feels so right

Could never be so wrong  
Plea for clemency  
You're wasting time  
My routine  
Is the scene of the crime  
I make the Devil laugh  
And Angels wail  
Forever I will reside  
Beyond the pale

Heartless bastard cold as ice  
Victim of my own device  
The strong prey on the weak  
Dead men, they never speak  
All part of man's condition  
On this path to our perdition  
We kill along the way  
Death never takes a holiday

Suffering spreads like the plague  
Reasons why, still oh so vague  
The siren song of slaughter summons me  
To inner demons I succumb  
I know not that which I've become  
Exhibit A in man's atrocity

[Chorus]
