

# Time of Your Song

## Matisyahu

The world is moving to the song I hear,  
Who's that singing, wind is rushing in my ear,  
Mind gushing memories almost lost everything,  
Felony and fellows running in my dream,  
We were in the van where the hits were driving,  
Saw myself In the highlands at age 13  
And I'm asking questions to the present day me,  
Moving backwards down the hill see we were posting. Moonlight illuminate my night and my days sun ray make  
the people say  
And a vision something's missing so they're screaming out loud  
Keep my feet on the ground and my head in the clouds.  
I'm the arrow, you're my bow, shoot me forth and I will go  
And I know and I go and I go get up and go  
Make me feel it's for real tell me what you know. I don't need to glorify,  
Ate the apple of the tree and tried to lie,  
In the garden I'll remember  
That's when I started to sing  
I said death brings life into uncertain things,  
Cut some slack for me  
Sun setting autumn breeze  
Sound is moving like a chorus  
Keep hearing that melody,  
Check the radio but there's nothing playing,  
Check the radio again but there's nothing playing. Moonlight illuminate my night and my days sun ray make the  
people say  
And a vision something's missing so they're screaming out loud  
Keep my feet on the ground and my head in the clouds.  
I'm the arrow, you're my bow, shoot me forth and I will go  
And I know and I go and I go get up and go  
Make me feel it's for real tell me what you know. Rewind! Swing low, sweet chariot of flames  
Change my name, yo!  
It was always the same,  
Till if only what you find when you climb,  
Check the radio but of all that shines there's no time,  
My life is making your mind work in overtime,  
But along the line you'll have to pay for the crime.  
Slow it down, you turbo too soon,  
Vroom vroom then you want to blast off unto the moon,  
But you might get trapped in a temple of doom,

You might get trapped in a temple of doom. Moonlight illuminate my night and my days sun ray make the  
people say  
And a vision something's missing so they're screaming out loud  
Keep my feet on the ground and my head in the clouds.  
I'm the arrow, you're my bow, shoot me forth and I will go  
And I know and I go and I go get up and go  
Make me feel it's for real tell me what you know. I'm the arrow, you're my bow, shoot me forth and I will go  
And I know and I go and I go get up and go  
Make me feel it's for real tell me what you know.  
Tell me what you know, tell me what you know.
