Last Days Of Disco

[unknown]

Stand by me, I've been stood by you for ages
Stay calm and carry on, maybe nothing's wrong
Is it the comfort of disinformation or is it the freedom that you fear?
Said I'm the angel of liberation, love, for a second I believe her
I'm all you'll hear, aah, while you're here, aah
Don't call it a comeback, look what I invented here
I thought it was easy, they came and took it away from us
The last days of disco
All raved out, bitter is the pill of devotion
Read between the noise, all you disco boys, all you disco boys
The fascination of a boy and girl in love, for a second I can see her
In the mirror ball, the human animal, I'm the creature that I fear
I'm all you'll hear, aah, while you're here, aah
Don't call it a comeback, look what I invented here
I thought it was easy, they came and took it away from us
The last days of disco, the last days of disco
The last days of disco
I'm all you'll hear, aah, while you're here, aah
Don't call it a comeback, we'll hold an event in here
This space is beautiful, I'll decide when it is over
So don't call it a comeback, look what I invented here
I thought it was easy, they came and took it away from us
The last days of disco, the last days of disco
The last days of disco
[Incomprehensible]
