

Bloodmoon

White Sea

Eclipse was on the TV screen
Life that we know is ending
Why do they watch as I stare at the sun
They're swimming in my bloodstreamMiami color in the sky
Keep your lover deep inside
FallingLate night in a crowded room
They won't come back I'm telling you
I'm telling you
There's blood on the moon
Make love to say a small goodbye
Stars align and they have no clue
They have no clue
There's blood on the moon
All of the promises we bring
We won't get to keep them
We fantasize that it was all a dream
But genesis is risingMiami color in the sky
Keep your lover deep inside
FallingLate night in a crowded room
They won't come back I'm telling you
I'm telling you
There's blood on the moon
Make love to say a small goodbye
Stars align and they have no clue
They have no clue
There's blood on the moon
The day you were born
There was blood in the water
The day you were born
There was blood in the waterLate night in a crowded room
They won't come back I'm telling you
I'm telling you
There's blood on the moon
Make love to say a small goodbye
Stars align and they have no clue
They have no clue
There's blood on the moon
