Meet Me On the Other Side

Restless Heart

Lover's moon, a forgotten road
Two lonely strangers a thousand miles from home
Two hearts, just trying to find their way
Like skipping stones in a desperate flight
We caught the wind and sailed across that great divide
Thrown to the night we let passion guide our way
And I can still hear her say
Meet me on the other side
Let's not forget what we shared tonight
That lonely river's running deep and wide
Say you'll meet me on the other side
Her restless soul took her off somewhere
Night after night I think I see her face out there
A glimpse of love through a haunted memory
Ship of dreams come and ease my mind
Make me believe I never left that girl behind
Gypsy wind take a message back for me
Yeah, let her hear what I say
Meet me on the other side
Please don't forget what we shared that night
That lonely river's running deep and wide
Say you'll meet me on the other side
Say you'll meet me on the other side
A raging storm out on a empty sea
A tempest born one night of ecstasy
Now she's gone and I'm just a lonely castaway (lonely castaway)
Meet me on the other side
Please don't forget what we shared that night
This lonely river's running deep and wide
Say you'll meet me on the other side
Say you'll meet me on the other side
Meet me on the other side
