No More Room To Breathe

There for Tomorrow

You've got to know by now
That stepping in and out will bring you down
Until you make it definite
Until you make it definiteSix fifteen sacrifice your rest
I thought you said you're different
For those who believe in it
They parade in universitiesOh, not another mind made up
From doing nothing more than all you say
I got no more room to breathe
Until we just get them toSay, we'll make them say
That we've been down and out all day
If your education brings you home
Why are you still away?So give it up if you're not still trying to
Hold it up in your four time windowed room
I've got the feeling that you're notUsing up all of your best bets
On plans that you still don't have set
For those who believe in it
They pray
Until we just get them toSay, we'll make them say
That we've been down and out all day
If your education brings you home
Why are you still away?Say, we'll make them see
That we've got no more room to breathe
If your education brings you home
Why are you still away?I gave it all
The thoughts you said you needed
But the minutes got repeated
For too long, far too longCan you save us all
From the thoughts you said you needed?
'Cause I feel like I've competed
For too long, far too longWe've got no more room to breathe
Until we just get them to see
We've got no more room to breathe
Until we just get them toSay, we'll make them say
That we've been down and out all day
If your education brings you home
Why are you still away?Say, we'll make them see
That we've got no more room to breathe
If your education brings you home

Why are you still away?
