# For a Moment

## Danny Jean

Lately I've been thinking about the ups and downs
We've been through together and how we almost lost our ground
We held on long enough to see, all the good outweigh the bad
And I'm thankful, so grateful for everything we haveBut for a moment I thought I lost everything
For a moment I forgot about our memories
Then I woke up and I realized how much you mean to me
For a moment I thought I lost you and meMy first love, my first kiss, I shared both of them with you
From the first time we locked eyes, I knew you and I would be the truth
But since then you've lied to me, I've lied to you
But we made up and I'm thankful, so grateful for everything we haveSo beautiful that's what we are
I'm your sky and you're my star
All the trials that we've been through
Only made us who we are todayBut for a moment I thought I lost everything
For a moment I forgot about our memories
Then I woke up and I realized how much you mean to me
For a moment I thought I lost you and meYou're connected to everything and everybody that matters to me
You're the center of all my charm, without you I wouldn't be
I thought I lost my best friend, my perfect world came to an end
But it was just a dream that felt like realityFor a moment I thought I lost everything
(I thought I lost my baby, oh yes, I did)
For a moment I forgot about our memoriesAnd then I opened my eyes
Then I woke up and I realized how much you mean to me
For a moment I thought I lost you and me
I thought I lost you and me
