

# You Surround Me

Bebo Norman

There's never a day away from you  
I'm not a complete mess  
If I ever stay away from you  
It's only emptiness  
But love lasts longer  
And love stands stronger  
Than anything that's in between us  
There's never a day away from you Girl, you surround me  
You're all around me  
You capture me with everything you do  
Girl, you surround me There's never a day away from you  
When I'm able to breathe  
Whatever this world is coming to  
I want you next to me  
Because love lasts longer  
And love stands stronger  
Than anything that's in between us  
There's never a day away from you Girl, you surround me  
You're all around me  
You capture me with everything you do  
Girl, you surround me  
You're all around me  
You capture me with everything you do  
Girl, you surround me
