The Offer

Imperial Leather

I have a proposal, a deal we could make
Read it over slowly and see whats at stake
A resume puffed up or full of accolades
Its what I have none ofIm not good at soap boxing matters of heart
I dont have a life thats a great work of art
Though I am not trained I think I know enough
I can offer loveSo choose
And make sure you know what youre getting into
This wont be one of those love and leave experiments
That might not work for youDo you know what happens when hearts are afraid?
They dont see when true love is right in their face
But you dont have to worry you dont have to wait
To take my offer upSo choose
And make sure you know what youre getting into
This wont be one of those love and leave experiments
That might not work for you
