

Working Girl

Little Boots

Take a breath as you look in the mirror
Suit and tie line your eyes til they shimmer
And you can't look back no you won't look back
Struck a deal paid a price are you worth it
Made a call rolled a dice to be perfect
Now you just can't stop
No you just won't stop
And every step you take will take you far
So who do you think you are
Please don't fail me now
I would never let you let me down
No, never never
Working girl
Comprise but your smile is defiant
Try to hide little lies keep it quiet
Never let it show never let them know
Every step you take will take you far
So who do you think you are
Please don't fail me now
I would never let you let me down
No, never never
Working girl
Please don't fail me now
I would never let you let me down
No, never never
Working girl
Can you have it all?
All you want and more
It's so hard, it's so hard for a working girl
Come so far come so far for a working girl
Please don't fail me now
I would never let you let me down
No, never never
Working girl
It's so hard, it's so hard for a working girl
Come so far come so far for a working girl
It's so hard, it's so hard for a working girl
Come so far come so far for a working girl
