

Over Everything (feat. Jussie Smollett & Yazz)

Empire Cast

[Jamal:]

Like the water to the fire
We're gonna find a way to make it alright
No looking in the rearview
The [?] shows that our futures bright
Together we stand, divided we fall
Building up the bridge and we're tearing down the wall
We done been through the worse
Love conquers all even if the truth hurts
If we don't, stand for something then we'll fall or anything
Blood is so much thicker, then water
Like a prince is proud to see his king
I'm proud to say its us over everything
No matter what you know I'm here forever
No matter what I know you're here forever
We've been through the storm and we're still together
We're back together now and ohhhhh
It's you and me over everything
And ohhhhh
It's you and me over everything
Leave it all behind, no more wasted time
Too focused on what's behind us now
Made it through the fire, finally got it right
This is what I've been waiting for, practically, my whole life[Hakeem:]
See I always stick up for my bro
Because loyalty is all I know
And I ride for him and I won't lose control, even when we hit bumps in the road
We get money, on our own
I treat it baseball and bring it back home
No King Kong, but we're strong
So just like to think better leave us alone
We're [?] shoppers we've been through a whole lot
This a derail, not a road block
I put my family over everything like hot sauce in the stove top
You want me retaliate, that's why nobody related
I run for my bros, you run from my folks, I'm going in hard no debating
If they need anything then I got em
Promise all of their problems, my problems
I can always tell one thing about em, they hold me down even when I hit rock bottom

Through it all when I fall, the pick me up like a phone call
No pretend, on my kin
We going for the win like a low ball[Jamal:]
No matter what you know I'm here forever
No matter what I know you're here forever
We've been through the storm and we're still together
We're back together now and ohhhhh
It's you and me over everything
And ohhhhh
It's you and me over everything
