

T/false Fiction

[Mxpx](#)

they guarantee our freedom but freedom isn't real unless you know Christ you won't know how i feel false
finite ways of thinking false fiction they're believing inflections of the way things were supposed to be the
mental disorder of our society entropy is still promoting chaos it's chaos, it's your loss your failed system is
inducing chaos maybe this world has stopped thinking it's chaos, it's your loss maybe all their minds are
shrinking common sense, logic, science, a humble self esteem taking what the world has offered, but you forgot
the pack building, moving forward never looking back live to die and die to gain, about the selfish scene
