World Inside The World

Rhett Miller

There is a world inside the world that you see
And it's okay to count the minutes 'cause how many could there be
And if love is all around us how could this have found us
The move you know is don't let go of meThere is a world inside the world that you see
Let's call her Halcyon and hope that she holds
'Cause every shore she's gonna touch is gonna turn to solid gold
She and I been wishing for a change in our condition
It's not given but it's obvious to meThere is a world inside the world
There is a world inside the world
There is a world inside the world that you see
There is a world inside the world that you seeI read it in Delillo like they'd written it to me
And if love is all we're made then what am I afraid of
Just 'cause freedom rings it doesn't mean we're freeThere is a world inside the world
There is a world inside the world
There is a world inside the world
There is a world inside the world
There is a world inside the world that you see
