

The Prodigal Sun

The Black Angels

Oh now now
Oh now now, Oh now now now hey
You scare us, yeah, you welcome us,
and you motion us to move our mouths.
and we lie, yes we lie.
You know our thoughts, you put them there.
You free us, tell us where to fall,
so we hide, yes we hide.
oh oh oh oh
When I breath again, I swear, it'll be with you.

Oh now now now now
oh now now, oh now now now hey
You make us yeah, you cure us yes.
You kill the calf, as we second guess the first try,
the suns too cold, oh no no no
The darkness falls, as nothing moves.
Your heartbeat slows, it gets too cold so you sleep,
yes we all sleep
oh no no no
When i rise again,
I swear, it'll be with you
