

# Elam

## Run River North

It seems essential  
No point in keeping this down  
This point of tension between the message and sound  
My head is breaking  
I fear there's too much coming in  
All that you're saying to me Spend no expenses  
You've got an outfit for every scene  
No one is watching  
You live like you never know  
Your heart is breaking  
I fear there's too much coming in  
All that I'm saying to you When will this stop?  
Would you tell me?  
Cause we're killing with words and turning the other cheek  
No one to fall  
Could you believe me?  
Cause we're killing with words and turning the other cheek There's still potential  
This plot to twist, some into resting fact wrapped up in fiction  
Like you're mixed in with incense  
Our wall is breaking  
I know there's too much coming in  
All that we're saying  
All that we're saying When will this stop?  
Would you tell me?  
Cause we're killing with words and turning the other cheek  
No one to fall  
Could you believe me?  
Cause we're killing with words and turning the other cheek Show me your truths and tell me your sides  
Show me your truths and tell me your sides  
Show me your truths and tell me your sides  
Show me your truths and tell me your sides  
Show me your truths and tell me your sides When will this stop?  
Would you tell me?  
Cause we're killing with words and turning the other cheek  
No one to fall  
Could you believe me?  
Cause we're killing with words and turning the other cheek  
Killing with words and turning the other cheek
