

# Under These Lights

[Xenia Ghali](#)

A sea of souls and dancing daughters  
Different stories, different blood  
All together dreaming  
Wish everyone could see it  
Waves of life colliding love Under these lights embracing all life  
We are lost in within these beautiful sights  
In these walls the world is so bright  
Let's spread the warmth we found. under these lights  
Under these lights. under these lights.  
Let's spread the warmth we found  
Under these lights. under these lights.  
Let's spread the warmth we found  
Under these lights. under these lights.  
Let's spread the warmth we found A field of hearts here in a moment  
Beneath the sun, beneath the moon  
All together beating  
Wish everyone could feel it  
Breathing beauty, living proof Under these lights embracing all life  
We are lost in within these beautiful sights  
In these walls the world is so bright  
Let's spread the warmth we found. under these lights  
Under these lights. under these lights.  
Let's spread the warmth we found  
Under these lights. under these lights.  
Let's spread the warmth we found  
Under these lights. under these lights.  
Let's spread the warmth we found...
