

# Show Me The Way (feat. Aloe Blacc)

## Dilated Peoples

The harder the work well the longer the day  
Easy may come but it sure don't stay  
Trying to cope, boy I hope and I pray  
Show me the way The harder the work well the longer the day  
Easy may come but it sure don't stay  
Trying to cope, boy, I hope and I pray  
Somebody show me the way I say hello to my people, hello to the day  
I watch the world on wheels, hit the yellow and gray  
The ones don't work are the ones don't eat  
And once again, from the city where that sun don't sleep  
It's time to get live because the terms are breached  
Ride the wave like the world is a beach, learn more I teach  
I was raised by N.W.A and stayed CA  
All day, same story difference brief case  
I'm nonchalant to others peddling weight  
I got a purpose to serving up and settle my state  
Been through it, all of it great  
Put the ruler to the movement, all of it straight  
Big fish? Even all of them bait  
One love, one dish, see 'em all on my plate  
I'll take the lady on a vacay, she call it a date  
Now she calling in sick, now she calling in late The harder the work well the longer the day  
Easy may come but it sure don't stay  
Trying to cope, boy, I hope and I pray  
Somebody show me the way, somebody show me the way  
I've been through some pitfalls that knocked me down  
Made it through close calls and lost some ground  
It's a hell of a price I pay  
Somebody show me the way, somebody show me the way The moon tagged the sun in, love to be alive  
Feet hit the ground running, butterflies in my stomach  
Like I'm anxious trying to get it, trying to learn a lot from it  
On a planet in regression, in a loft at the summit  
Air is much clearer, catch me on the high road  
Some fight to live, others settle for survival  
It's your world, you can write the line you live your life on  
It's heavy but you're strong, just hold on until that light dawns  
It's started now, pardon me we're partying  
Escalating, redefining the state of the art again  
Celebrated, elevators open up to secret floors

Different rules and secret laws, from the roof you'll see the stars  
Only fear boredom in a world of raw materials  
Excited by potential, inspired by adventure  
Calculated circles, circumference and radius  
The only cats that float without a float through the parade is us  
The harder the work well the longer the day  
Easy may come but it sure don't stay  
Trying to cope, boy, I hope and I pray  
Somebody show me the way, somebody show me the way  
I've been through some pitfalls that knocked me down  
Made it through close calls and lost some ground  
It's a hell of a price I pay  
Somebody show me the way, somebody show me the way  
It's routine, by the beach I rise  
First up, I hit the weed then I bleach my eyes  
Then it's to the drum machine to speak my mind  
Tracks like fitted hats, pick a beat my size  
Energizing, on the darkest streets I shine  
Saw the light up on the mountain, to the peak I climbed  
Breathtaking new perspectives on the life I grind  
First tear of joy fell, looking like I'm crying  
For a just a moment  
The feeling of being content  
Not needing a dollar or a cent  
Smile for my mama cause she proud  
The studio, my headphones loud  
Bridge builders will connect these crowds  
Dedicated on my honor you can check these vows  
That's purpose, power to make the powerful nervous  
Hard work ain't easy but easy usually ain't worth it  
They say  
The harder the work well the longer the day  
Easy may come but it sure don't stay  
Trying to cope, boy, I hope and I pray  
Somebody show me the way, somebody show me the way  
I've been through some pitfalls that knocked me down  
Made it through close calls and lost some ground  
It's a hell of a price I pay  
Somebody show me the way, somebody show me the way
