

Fight Or Flight

G Herbo

We're ready to go
Ticks like a bomb that's about to blow
It's taking control
Pulling at your feet like an undertow
You don't really know

If you're all that capable
But you've been told
Don't pretend you're stupid
Figure it out
Sort it out
Go make yourself useful
You're better than dead
You really made a mess with the words you said
So easily fed

The flames of the fire rise above your head
They want to be led
You've joined the ranks instead
There's a voice in your head
I can't figure it out
Any more than the generation before me
I can't figure it out
How we got where we are today
I can't figure it out
Any more than the generation before me
I can't figure it out
We've got to fight not to fade away
