

# Fight Or Flight

G Herbo

We're ready to go Ticking like a bomb that's about to blow  
It's taking control Pulling at your feet like an  
undertow You don't really know

If you're all that capable But you've been told  
Don't pretend you're stupid Figure it out  
Sort it out Go make yourself useful You're better than dead  
You really made a mess with the words you said So  
easily fed

The flames of the fire rise above your head  
They want to be led  
You've joined the ranks instead There's a voice in your head  
I can't figure it out Any more than the generation  
before me I can't figure it out How we got where we are today  
I can't figure it out  
Any more than the generation before me I can't figure it out  
We've got to fight not to fade away
