Old Time Problem

Pepper

Well, I see the sunshine in your hair
But I'm tied up with inebriation
Naughty girl, leave me aloneIt's a moonshine love
I'm so jealous that I cut my hand off
Broken glass is in my veinsYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorNow that I'm a tipping toes
I'm looking outside through the bullet holes
No one will ever know, how hard it is to answer the phoneAll my words get twisted, all my faith gets lifted
All my pain is drifting, and I don't know whyYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorWell, I get so tired of trying
When I know you'll never be pleased
You're always giving me something
But never anything I needOr maybe this ain't working
My back's against the wall
Maybe it ain't working
But that's the way it goesYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorYou're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floorYou're like an old time, old time problem hey
And when I should have left you alone
Well, now you got me on the floor
