

# On and On

## Arch Enemy

We walk through war in the halls  
Of dead protocols  
We came so close, demands were met  
That's when the rug was ripped out  
From under our feet  
A vicious crime, cold betrayal and deceit Then reality hits you  
Like a stab in the back  
Like a slap in the face  
A premeditated attack On and on  
The battle knows no victory  
On and on  
Weapons high  
Reject defeat Decrepit smiles shine like fire  
Lying through their teeth  
It's a memory you want to forget  
From one second to another  
The whole world went under  
The future cuts so deep  
Tangibility bleeds Then reality hits you  
Like a stab in the back  
Like a slap in the face  
A premeditated attack On and on  
The battle knows no victory  
On and on  
Weapons high  
Reject defeat On and on  
Until the victory is dead and gone  
On and on  
Kill the history  
The wrong side won On and on  
On, on and on On and on  
The battle knows no victory  
On and on  
Weapons high  
Don't let the history repeat The battle knows no victory  
Weapons high  
Reject defeat
