

Bleeding Out

Stitched Up Heart

Looking in to a world
That's all but clear
Blind and blurry
Walk the line between love and fear
Innocence is lost
Can't make it up now
Got you high
But you never thought
There'd be a comedown He pushes you around
Hits you another time
You don't make a sound No matter what I say
My words are empty
If you can hear me
Calling out
Well I can't save you now
If you' won't let me
The scars no one can see
Bleeding out Every color turns another shade of
Black and blue
The lies twist in your mind
And turn into truths
Tell me where is the bottom
Does it ever end
Cause all I see is you
Doing this again and again He pushes you around
Hits you another time
You don't make a sound No matter what I say
My words are empty
If you can hear me
Calling out
Well I can't save you now
If you' won't let me
The scars no one can see
Bleeding out
