

# Human Jerky and the Active Cultures

## Cattle Decapitation

Sutured slabs of beef  
Active cultures of yogurt and yeast  
Acidophilus interacts with tissue  
Suffocated by the stench of sinew  
Vomited dairy products  
Peppers, seasonings  
Striated muscle flaps  
No fruit on the bottom  
Inhumane, carnivorous jerky wraps  
Agonizing odor of the industry  
Ever consuming multiplying fungus  
It's all around you  
In the air you breathe  
In the food you eat  
In the bed you sleep  
In the rotting meat  
Ever looming presence of rot and disease  
Unseen and disguised  
Slowly, chemically altered  
Programmed and chastised  
To believe that life is grand  
As your arteries squeeze shut  
You now realize  
They're thinning out the numbers  
This is the state of the union  
This is the state of the mess  
This is the truth behind happiness  
And the ignorance of man  
Destroy what we've been given  
Dig our graves a little deeper  
Fuck this world we live in  
And fuck its ugly inhabitants  
Long live the stench
