As I Make My Way

The Commuters

I'm seeing light from the other side of morning
Reflected light from the other side of day
I'm seeing light from the other side of morning
I'm seeing light, my mind is blown awayMy mind is blown away -- away
I'll figure it out as I make my wayI watch the world from the other side of owning
The things I've held, I've let them go away
I watch the world from the other side of owning
I watch the world, desires have slipped awayDesires have slipped away -- away
I'll figure it out as I make my wayI'm on a journey, I've got my faith
I don't have to worry about my fate
The planets align as the will dictates
I'm writing it out as I make my wayI walk through time with a different understanding
Embracing what I see along the way
I walk though time with a different understanding
I'll figure it out, as I make my way...as I make my way -- my way
I'll figure it out as I make my wayI'm on a journey, I've got my faith
I don't have to worry about my fate
The planets align as the will dictates
I'm writing it out as I make my way...
(As I make my way) As I make my way
(As I make my way) As I make my way
(As I make my way) As I make my way
(As I make my way)
