Parasite

Exodus

A distant hum
Cuts right through the skies
Calling my attention I look up
I can't believe my eyesThousands and thousands
Hungry for our minds
They're biting, eating and controlling
Anything they findComing down from behind
They've got no care for our kind
See the world bending down
On it's kneesRun but you can't hide
Blood coming from inside
My mind doesn't know wrong from right
ParasiteA million more
Coming after me
They thrive on insecticide
They live on DDTNo poison can defeat
The never ending swarm
They'll eat you from inside out
You'll wish you were never bornComing down from behind
They've got no care for our kind
See the world bending down
On it's kneesRun but you can't hide
Blood coming from inside
My mind doesn't know wrong from right
ParasiteNow they're living in my brain
I'm destroying at their cue
A violent reaction starts within
And now I'm after youI'll grab you by your head
And split your skull open wide
The infestation in complete
You're dead but yet aliveComing down from behind
They've got no care for our kind
See the world bending down
On it's kneesRun but you can't hide
Blood coming from inside
My mind doesn't know wrong from right
Parasite
