

That's That

Scatterbrain

by Scatterbrain

from the recording titled 'Here Comes Trouble' Color by numbers, stay inside the lines

Ya got a question? Check the rulebook, see the grand design -

See the world, wow! It's black & white,

Where rules are rules, and wrong is wrong

And right is right - That's right Hey kids check it out,

Upside down or inside out,

This is it, it's what it's all about

Strike one, strike two, strike three you're out It's seconds, minutes, hours, daze inside a maze,

Ya keep your feet upon the yellow bricks, you got it made

'Cause every piece of the puzzle fits the master plan,

In this pre-fabricated, formulated land.

It's every piece in it's place.

Red light, green light, simon sez

take a tiny step forward and ask again. Nothing left to chance, this ain't no lottery

Play it safe, keep it simple - A, B, C - 1, 2, 3

That's good, but this is bad

Smile when you're happy, cry when you're sad Hey kids check it out,

Upside down or inside out,

This is it, it's what it's all about

Strike one, strike two, strike three you're out

Check it out, see hear what it's all about It's seconds, minutes, hours, daze inside a maze,

Ya keep your feet upon the yellow bricks, you got it made

'Cause every piece of the puzzle fits the master plan,

In this pre-fabricated, formulated land.

It's every piece in it's place.

Red light, green light, simon sez

take a tiny step forward and ask again. Everybody this is this and I said that is that

See hear everybody this is where it's at - That's that. Hey kids check it out,

Upside down or inside out,

This is it, it's what it's all about

Strike one, strike two, strike three you're out

Check it out, see hear what it's all about

This is this & that's that, check it out.-----
