# Your Life Beside Us

## Mark Olson

Outside the day is light
You have faith and reason to be right
And never touch the groundA cold wind stirs our fears
Deep inside your work is in the years
And never touch the groundYesterday I believed your word
I will always be with you my soul
All this time we have been alone
Walk together now is in our heart
And wander in the shadows falling
Your life beside us
Your life beside usHold my hand
And reach among the stars at your command
And never touch the groundYesterday I believed your word
I will always be with you my soul
All this time we have been alone
Walk together now is in our heart
And wander in the shadows falling
Your life beside us
Your life beside usLeave the lightning bar
Walk the streets back homeI will always be with you my soul
Walk together now is in our heart
I will always be with you my soul
And wander in the shadows falling
Your life beside us
Your life beside usYesterday's child is still left to go on alone at night
Yesterday's child is still left to go on alone at night
