

# And the Sky Began to Scream

## How to Destroy Angels

Worn the skin off both my knees  
Waited oh so patiently  
Staring straight into the sun  
Never thought you would've come No, no  
No, no  
No, no Somewhere sits an empty throne  
Like we've always kind of known  
Variations on a theme  
And the sky began to scream I will, tear it down, to the ground, and build another one [x6]
