Escape

Hoobastank

Like other day goes without any change

The feeling we live with still remains

We're stuck in a hole and we're searching for anything to hold onto There has to be somewhere that we can be safe

From the lives we live each day

There has to be somewhere that we can be far awayWe have to escape and I will go anywhere if you just lead the way

Escape to a place where we'll be together, together everyday

We have to escapeWe could be living how we wanted to

Instead of doing things we're forced to do

With no one to tell us that we should be going through

What they went through There has to be someplace that nobody knows

Somewhere we can only go

There has to be someplace that we can be all aloneWe have to escape and I will go anywhere if you just lead the way

Escape to a place where we'll be together, together everydayWe have to escape and I will go anywhere if you just lead the way

Escape to a place where we'll be together, together everyday

Together everyday, oh yeahWe have to escape

We have to escapeWe have to escape and I will go anywhere if you just lead the way

Escape to a place where we'll be together, together everydayWe have to escape and I will go anywhere if you just lead the way

Escape to a place where we'll be together, together everyday

We have to escape
