

Strike the Match

Autodrone

Strike It!

Verse 1:

Wait baby with the blue jeans on

You've been staring at me all night long

I know you want it and you know it's wrong

But you don't worry about the danger, do you?

I see you swearing things from over there

I see you slowly but if you don't care

Act then you like you shut up or you best be aware

I can let your match start a fire in here
